## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a method and an arrangement in the area of estimation of line properties of a signal line (subscriber line), such as the line length and line attenuation. The length and attenuation of a signal line between a transmitter and a customer premises equipment is to be estimated. Frequency dependent line input impedance ( $Z_{in}(f)$ ) as seen from the transmitter, is measured and an absolute impedance value ( $|Z_{in}(f)|$ ) is generated. Extreme values (Max.1, Max2, Max3; Min1, Min2, Min3) are denoted and a frequency distance (FD1-FD4) between two consecutive of the extreme values is generated. The line length (L) is generated as  $L=1/2*vop/FD1$ , in which vop is the velocity of propagation of a signal on the line. The attenuation is estimated by multiplying the line length with an average attenuation value for the actual line type. The advantages are that the line length can be estimated with good accuracy in a simple manner for short lines and that the line attenuation is estimated in a simple manner.

Prior art of record failed to teach or fairly suggest in combination the method and system of generating line properties of a signal line including generating a frequency dependent line input impedance for a loop, the loop including the signal line and a remote device the method being characterized by: Generating an absolute value function from the frequency dependent line input impedance the function being essentially periodic; *Selecting at least two consecutive extreme values of the same type of the absolute value function; Generating a frequency distance*

*based on said at least two extreme values; Generating a line length value based on the frequency distance and a velocity of propagation for a signal on the signal line.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
